DILLINGER

We are Pure Steel+

Innovation and the future are always created by visionaries.

We are creators – in steel construction, mechanical engineering, and the energy sector.

As Europe's leading heavy plate manufacturer, we offer an impressive product portfolio. We are driven by our ambition to constantly redefine the standards of the industry. We only promise what we can deliver – and in the steel sector, we deliver more than anyone else.

The best steel for the world of tomorrow is carbon-reduced.

Pure quality, pure innovation: Pure Steel+

Steel plate from Dillinger has long been an integral part of the energy transition, and it can be found in offshore wind turbines, solar parks, and pumped storage facilities. Our goal: carbon-neutral steel production in 2045. To achieve this, we will soon be focusing on the use of hydrogen, on electric steel production, and on using steel scrap.
